Earl, please dispose of all materials , AST, shed, absorbent materials, etc. for Potlatch. Please direct all correspondence, notices, requests, etc. regarding the project to me.

Thanks

Brent Stinnett

Subject: Fwd: Avery re Potlatch AST and Shed

Do you want me to handle this or should I simply forward these to Brent?

Subject: Avery re Potlatch AST and Shed

Hello,

We mobilized to the Site on 05/29. For the first two weeks, we are focusing on the establishment of the Site operations area, including infrastructure, roadways, water treatment system, soil stockpile and dewatering areas, and truck staging areas.

We need to move the AST and small shed located on-Site. Regarding the AST: if you desire to keep the AST, you could send a vehicle to remove the tank and we will load the tank on the vehicle; we could move the AST to another location somewhere on-Site; or we could dispose of the AST for you. Regarding the small shed, it is falling apart and there is nothing we can do to save the shed itself. However, the shed is filled with used absorbent material, a lesser amount of unused absorbent material, and the electrical control panels associated with the former product recovery system. If desired, we can set these items aside somewhere on-Site or we dispose of the items for you.

Please advise how you would like for us to handle the tank and the shed contents. Thank you.
